Notes:

Titus 2

This is a generational description that will impact multiple generations.

Evangelism explosion model-

Evangelism by addition focuses on winning converts through personal effort, while multiplication focuses on making disciples who are trained to make more disciples.

Key Differences

- ✓ **Impact:** Addition results in steady, small increases; multiplication results in exponential, massive expansion.
- ✓ **Action:** Multiplication requires reproducing yourself (training), while addition often means the leader does everything.
- ✓ **Goal:** Multiplication aims for a lasting, self-sustaining movement.
